5. 6.	Info Trailing slash From line 7, column 3; to e=1" />== Info Trailing slash	<pre><meta content="width=device-width, initial-scale=1" name="viewport"/> on void elements has no effect and interacts badly with unquoted attribute values. line 7, column 47</pre>
	Info Trailing slash From line 7, column 3; to e=1" />=	<pre></pre>

Index.html cont.

The trailing slashes are caused by React's self-closing tags in the generated html. I have chosen to leave them as is for now and look into alternatives (if necessary) before future developments take place.

The bad value error comes from React's use of '%PUBLIC_URL%'. They say:

It will be replaced with the URL of the `public` folder during the build. Only files inside the `public` folder can be referenced from the HTML.

These errors/info points won't be addressed in further reports, however unique errors/info points will be.
